

ArmaSound®

Benefits of ArmaSound

- Reduces Noise Substantially: Through its engineered pore geometry, formulation and composition, this material can offer substantially higher acoustic energy absorption. High NRC (Noise Reduction Coefficient), High Insertion Loss and High STC (Sound Transmission Class) reduce noise generated.
- Active Anti – Microbial Protection: Microban® anti microbial protection is built into ArmaSound Super Silence Ductliner during the manufacturing process, giving continuous active protection against microbial growth and provides the basis for continuous system hygiene.
- Noise Blocking and Vibration Dampening
- Easy Installation
- Longer Life

Physical Properties

- Available Thicknesses 6 mm, 10 mm, 15 mm, 25 mm, 30 mm, 40 mm & 50 mm
- Density 140 – 180 kg/m³
- Service Temperature range +85 to -20 degree celcius

How Does Microban® Work?

Microban® antimicrobial product protection technology, gives an enhanced level of protection against harmful microbes such as bacteria, mold, mildew and fungi.

When microbes come in contact with the product surface, Microban® antimicrobial product protection, penetrates the cell wall of the micro – organism, disrupting the cell functions and disabling its ability to function, grow and reproduce.
